

Macquarie University's Computer Science & Engineering Made in the Top 200 Globally

In the 2022 Global Ranking of Academic Subjects, recently released by ShanghaiRanking, Macquarie University's **Computer Science & Engineering** entered the **Top 200 in the world** – steadily climbing over the past few years (2022: 151-200, 2021: 201-300, 2020: 301-400) from outside of Top 500 before 2020.

Since 2017, the Global Ranking of Academic Subjects ranks the world's top universities in individual subject areas using a range of objective academic indicators including research output, research influence, international collaboration, research quality, and international academic awards.

This latest ranking is a reflection of our high quality research and academic reputation recognised at an international level, and a testament to the hard work and dedication of the School's community towards being one of the highest-performing computing schools in Australia.
